

Upon completion of his medical study at the VU University Medical Center in 1995 Johannes Huitink obtained a PhD in cardiology at the same medical center in the same year. He completed his anesthesiology training at the Academic Medical Center in Amsterdam in 2001. In 2001 he became staff anesthesiologist at the Department of Anesthesiology and Intensive Care Medicine at the Netherlands Cancer Institute – Antoni van Leeuwenhoek hospital in Amsterdam, where he specialized in cancer anesthesia. There he combined clinical work in the operating rooms and intensive care unit with clinical and translational research. In 2007 he moved to Australia and worked as a consultant at the Department of Anaesthesia and Pain Medicine of Western Health in Melbourne. In 2008 he joined the staff of the Department of Anesthesiology at VU University Medical Center in Amsterdam, where he currently works and combines clinical work with teaching and research. He is head of the VUmc Airway Management Research Group with the aim to stimulate innovation in that field and increase patient safety. He has published many papers and is author or co-author of medical books within his fields of interest. He is an expert in difficult airway management, neuroanaesthesia including asleep-awake-asleep procedures, high fidelity medical simulation, air medical patient transportation and anaesthesia for cancer patients. He is course director, instructor and guest faculty for several national and international advanced airway management courses. He is founder of the Airway Management Academy. He is member of the International Advisory Board of *Anaesthesia Journal*. When not working you can find him in the water chasing wind and waves around the world
